11) Sample preparation

- a) The sample slide and the coverslip should be clean. The operator can insist and assist in cleaning the sample.
- b) Seal the coverslip with colourless nail paint or fluoromount (BD Bioscience). Ensure that nail paint is dried; otherwise it will spoil the objective lens.

- c) For live imaging users are requested to get all the necessary items needed. The facility will not be able to provide them any reagents/ items.
 - d) Contaminated slides will not be imaged on any system. In case of any undue requests from the user, the remarks column will note the same.
- 12) **Data** will be given on **CD /DVD/ formatted USB drives** only. Transfer of files via internet is not allowed.

The **Bio-Imaging Facility** is geared to provide all the users the best possible service and we request everyone to maintain a congenial environment of work for everybody. Thank you for your cooperation and support
